5. Distance Learning Enrollments, 2007-08

The Ohio Learning Network seeks information on distance learning at all Ohio institutions. OLN lists courses in both public and independent sectors. Their annual report lists extensive data on public campus activity, but would have nothing about independent-college students without your answer to this query.

"Distance Learning" is broadly described as the process of extending the majority of learning (70% or greater) or delivering instructional resource-sharing opportunities to locations away from the classroom site using video, audio, computer, multimedia communications or some combination of these with other traditional delivery methods.

Note: We are seeking a total per-section headcount, which assumes there will be some duplication in the enrollment headcount.

A. Number of sections in 2007-08

B. Headcount enrollment in all distance learning sections
